

## **Table A – Results of Internal Review Committee**

Date of Report: June 27, 2005

Water Body Under Evaluation:

Identification #: 1282  
Name: East Fork Tebo Creek  
Length of Segment: 12.0 miles  
County (ies): Henry

Use Attainability Analysis Study:

Identification #: 0240  
Submitter: Tetra Tech Inc.  
Date Received: May 23, 2005  
Use Evaluated: Whole Body Contact Recreation

UAA Completeness Check:

All Required Information Included?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Correct Forms Used?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Forms Signed and Dated?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Comments:		

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown  
Comments:

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: UAA survey occurred in April 2005 and no uses were observed. The stream met the maximum depth at one out of six sites and average depth criterion at two out of six sites. Because the overall depth is very shallow, there is not enough evidence to retain the whole body contact designation for the entire segment, but it is recommended that WBC be retained from site 288 to the mouth because increased depth indicates WBC recreation could reasonably take place.

**Committee Recommendation:** ☐ Retain Use ☒ Modify Use ☐ Remove Use ☐ Inconclusive

Committee Members: Stacia Bax, Ann Crawford, Donna Menown
